

Ziegra Ice Machines

(UK) Ltd

Ziegra ice machine sanitiser

GC 12.08

Benefits

- Approved for use in public water supplies
- Kills bacteria including Legionella, viruses, algae, fungi and fungal spores.
- Breaks down to water and oxygen, eliminating toxic products
- No taste or odour
- Removes bio-film
- Continues to disinfect after application
- Quick and easy to apply
- Environmentally friendly
- For all sizes and types of ice machine
- Available in 100ml tubes and 5L drums.

Introducing the solution into the ice machine

- If your ice machine has an automatic or manual Ziegra dosing system, simply add the required amount of Ziegra sanitiser to the reservoir and follow the directions appropriate to the system.
- If your ice machine does not have a dosing system, but it has a Ziegra triple water filter, isolate the filter, remove the RH cartridge and put the appropriate amount of sanitiser into the bowl, switch the ice machine on and run the ice machine until all the sanitiser is flushed through. When the sanitising process is complete, replace the filter cartridge and resume normal ice production.
- If your ice machine has a Ziegra single filter cartridge, purchase a Ziegra single sanitising cartridge. Pour the required amount of sanitiser into the empty sanitising cartridge and swap it with the standard filter cartridge. Switch the ice machine on then run for an appropriate amount of time to flush all of the sanitiser through the machine. When the sanitising process is complete, replace the filter cartridge and resume normal ice production.
- If your ice machine does not have a filter system, it is highly recommended that you fit the appropriate model for maximum hygiene, efficiency and reliability.
- Test the ice after flushing and repeat as necessary.
- For very contaminated systems, soaking of the water system in the solution may be necessary.

Safety

- Protect eyes and skin from the solution and take care not to ingest.
- If the solution is ingested or splashed in the eyes or on the skin, follow the guidelines on the MSDS.

Applications

- All Ziegra ice machines.
- Ziegra sanitiser is effective against a vast array of micro-organisms. Space prevents us from publishing a full list. If you have some concerns regarding particular species, please contact Ziegra.
